

Contributions/Beiträge General Information

Abstracted in Meteorological & Geostrophysical Abstracts (MGA), in *Geo Abstracts* and *GEOBASE Contributions to Atmospheric Physic / Beiträge zur Physik der Atmosphäre*

A publication of the Deutsche Meteorologische Gesellschaft Volume 71(1998) - ISSN 0005-8173

Editor-in-Chief (until 1999):

Jost Heintzenberg, Institut für Troposphärenforschung, Permoserstr. 15, D 04303 Leipzig, Germany Telephone (0341) 235 2321, Telefax (0341) 235 2361, e-mail Jost@Tropos.de

Technical Editor (until 1999):

Uwe Hoppmann Datenverarbeitung, Mecklenburger Str. 10a, D 30938 Burgwedel, Germany Telephone (05135)1347, Telefax (05135)1348, e-mail Meteosoft@T-Online.de

Editorial and Advisory Board (until 1999)

M.B. Baker, Univ. of Washington, Seattle, Wash., USA

D. L. Hartmann, Univ. of Washington, Seattle, Wash., USA

J. L. Brenguier, Meteo-France, Toulouse, France

L. Hasse, Universität Kiel, Germany

R. J. Charison, Univ. of Washington, Seattle, Wash., USA

F. Herbert, Universität Frankfurt am Main, Germany

P. Courtier, ECMWF, Reading, England

H. Hinzpeter, Universität Hamburg, Germany

H. C. Davies, ETH Zürich, Switzerland

P. Kahlig, Universität Wien, Austria

J. Egger, Universität München, Germany

H. Kraus, Universität Bonn, Germany

F. Fiedler, Universität Karlsruhe, Germany

F. Nieuwstadt, Technical University of Delft, The Netherlands

A. Fossmann, Université de Clermont-Ferrand, France

E. Raschke, GKSS-Forschungszentrum Geesthacht, Germany

H. F. Graf, MPI für Meteorologie, Hamburg, Germany

D. Spänkuch, Meteorol. Observatorium, Potsdam, Germany

H. Graßl, WMO, Geneva, Switzerland

R. Zellner, Universität-GH, Essen, Germany

G. Groß, Universität Hannover, Germany

Beiträge zur Physik der Atmosphäre - Contributions to Atmospheric Physics

Contents of Volumes 53 (1980) - 72 (1999)

Contents 1/1980

A. Ghazi and J.J. Barnett Ozone Behaviour and Stratospheric Thermal Structure During Southern Hemisphere Spring	1
A. Rimóczy-Paál Surface and Atmospheric Radiation Balance as Determined from Satellite Data	14
M. Gube, J. Schmetz, E. Raschke Solar Radiative Transfer in a Cloud Field	24
Y. Fouquart and B. Bonnel Computations of Solar Heating of the Earth's Atmosphere: A New Parameterization	35
M. Schmidt and P. Fabian Relationships Between Tropospheric Ozone Concentration and the General Weather Situation	63
H. Günther A Convective Mesoscale Wave Disturbance During GATE Investigated by Spectral Methods	74
H. Böttger and K. Fraedrich Disturbances in the Wavenumber-Frequency Domain Observed Along 50°N	90
J. Simpson, G. v. Helvoirt GATE Cloud - Sub Cloud Layer Interactions Examined Using a Three-Dimensional Cumulus Model	106
M. Eckardt, I. Haupt, D. Koslowsky and W. Tonn The First Simultaneous View From Space in Mercator-Projection	135
Book Reviews	139

Contents 2/1980

W.G. Zdunkowski, R.M. Welch and G. Korb An Investigation of the Structure of Typical Two-stream-methods for the Calculation of Solar Fluxes and Heating Rates in Clouds	147
D. Yordanov A Note on the Rossby Similarity of a Nonstationary Atmospheric Boundary Layer	167

J. Egger Blocking and Stratospheric Warming	172
E. Herbert PRIGOGINE's Diffusion Theorem and its Application to Atmospheric Transfer Processes Part 1: The Governing Theoretical Concept	181
H. Flohn Lessons from Climatic History	204
F. Wippermann On the Existence of Similarity in the Planetary Boundary Layer	213
H.P. Schmitz The Combined Effect of Bottom Topography, Wind Stress, and Air Pressure Gradient on the Generation on In- and External Surges	233
P.D. Thompson A Short-Range Prediction Scheme Based on Conservation Principles and the Generalized Balance Condition	256
W.-G. Panhans and R. Schrodin A One-Dimensional Circulation and Climate Model and its Application to the Lower Atmosphere	264
G. Fischer The Effect of a Planetary Scale Mountain on a Barotropic Flow Treated in a Simple Low- Order System	295
Contents 3/1980	
E. Reimer A Test of Objective Meteorological Analysis with Optimum Utilization of the Radiosonde Network in Central Europe	311
B. Hennemuth, H.J. Oberle, C. Freytag An Error Analysis of the Double-Theodolite Pibal Method with Examples from the Slopewind-Experiment Innsbruck 1978	336
R. Guzzi The Effect of Radiative Exchange on the Growth by Condensation of a Population of Droplets 351	
H.J. Jung The Determination of Rainfall Rates from Satellite Measurements of the Thermal Microwave	

Emission	366
P. Speth, A. Osthaus The Global Energy Budget of the Atmosphere Part III: Horizontal Transports of Sensible Heat and Momentum of Stationary Eddies and Connected Energy Conversions Throughout a Ten-Year Period (1967-1976)	389
Alain Cerf Atmospheric Turbidity over West-Africa	414
D. Henning and H. Flohn Some Aspects of Evaporation and Sensible Heat Flux of the Tropical Atlantic	430
P. Koepke Calibration of the METEOSAT IR-Channel by Ground Measurements	442
Book Reviews / Concise Book Reviews	446

Contents 4/1980

W.G. Zdunkowski, R.M. Welch, R.C. Hanson Direct and Diffuse Solar Radiation on Oriented Sloping Surfaces	449
J. Abele, D. Clement Chebyshev Approach to Fit Atmospheric Aerosol Size Distributions	469
K.P. Hoinka Synoptic-Scale Atmospheric Features and Foehn	486
E. Augstein, M. Wendel Modelling of the Time-Dependent Atmospheric Tradewind Boundary Layer with Non-Precipitating Cumulus Clouds	509
G. Hänel Prediction of the Standard Visual Range at High Relative Humidity: A Summary Considering Recent Data	539
Book Reviews	542

Contents 1/1981

Yeh T.-C. Recent Advances in Atmospheric Remote Sensing, Boundary Layer Physics and Synoptic and Dynamic Meteorology in China	1
R.P. Pearce	

A Dynamical Analysis of Hurricane Intensification	19
H. Hinzpeter, C. Wamser, G. Peters Monostatic Doppler-SODAR-Measurements of the Vertical Wind Field	43
G. Hänel, M. Lehmann Equilibrium Size of Aerosol Particles and Relative Humidity: New Experimental Data from Various Aerosol Types and their Treatment for Cloud Physics Application	57
S.K. Mishra On the Computational Efficiency of a Primitive Equation Barotropic Hemispheric Spectral Model	72
A.L. Carte Morphology of Persistent Storms in the Transvaal on 16/17 October 1978	86
R. Roth The Daily Variation of the Geostrophic Windspeed	101
W. Offenborn, H. Graßl Time Dependent Ocean Surface Temperature Variations Caused by an Increase of CO ₂ Content	107
B. Richter Atmospheric Microwave Thermal Emission in Presence of a Precipitating Cloud at 9.34, 33.1 and 94 GHz	123
Book Reviews	136
Necrology - Jacques Van Mieghem (1905 -1980)	142
Contents 2/1981	
J.P. Blanchet, H.G. Leighton The Influence of the Refractive Index and Size Spectrum on Atmospheric Heating due to Aerosols	143
G. Hatzel Influences of Physical and Chemical Properties of Atmospheric Particles on the Activation Process in Fog and Clouds	159
L.M. Leslie Comparative Performance of Convective Parameterization Schemes in a Short-term Prognosis Model	173
P. Speth, E. Kirk A One-Year Study of Power Spectra in Wavenumber-Frequency Domain	186

J. Straka, H. Geiß, K.J. Vogt Diffusion of Waste Air Puffs and Plumes under Changing Weather Conditions	207
H. Luthardt, L. Hasse On the Relationship Between Surface and Geostrophic Wind in the Region of the German Bight	222
A. Huss, Y. Feliks A Mesometeorological Numerical Model of the Sea and Land Breezes Involving Sea-Atmospheric Interactions	238
R.M. Welch, W.G. Zdunkowski The Radiative Characteristics of Noninteracting Cumulus Cloud Fields Part I: Parameterization for Finite Clouds	258
R.M. Welch, W.G. Zdunkowski The Radiative Characteristics of Noninteracting Cumulus Cloud Fields Part II: Calculations for Cloud Fields	273
R.S. Fraser Atmospheric Neutral Points Outside of the Principal Plane	286
F. Wippermann The Applicability of Several Approximations in Meso-Scale Modelling - A Linear Approach	298
Book Reviews	309
 Contents 3/1981	
F. Somieski Linear Theory of Three-Dimensional Flow over Mesoscale Mountains	315
H. Riehl The Limits of the Subtropical Jet Stream	335
J. Oerlemans, A.D. Vernekar A Model Study of the Relation Between Northern Hemisphere Glaciation and Precipitation Rates	352
R. M. Welch, W. G. Zdunkowski Improved Approximation for Diffuse Solar Radiation on Oriented Sloping Surfaces	362
M. Newiger, K. Böhnke Influence of Cloud Composition and Cloud Geometry on the Absorption of Solar Radiation	370
Book Reviews	383

Contents 4/1981

W. Wergen Nonlinear Normal Mode Initialization of a Multi-Level Fine-Mesh Model with Steep Orography	389
P. Mörl, M.E. Reinhardt, W. Renger, R. Schellhase The Use of the Airborne LIDAR System "ALEX F 1" for Aerosol Tracing in the Lower Troposphere	403
H.T. Mantis, C.S. Zerefos and C.C. Repapis Thermal Regimes of the Polar Stratosphere: An Analysis of USSR Rocket Soundings	411
B. Hennemuth Three-Dimensional Structure of Energy-Containing Eddies in the Surface Layer	422
J. Schmetz, E. Raschke, H. Fimpel Solar and Thermal Radiation in Maritime Stratocumulus Clouds	442
V. Renner Zonal Filtering Experiments with a Barotropic Model	453
J. Egger On the Linear Two-Dimensional Theory of Thermally Induced Slope Winds	465
R.M. Welch, W.G. Zdunkowski The Effect of Cloud Shape on Radiative Characteristics	482
F. Wippermann, G. Gross On the Construction of Orographically Influenced Wind Roses for Given Distributions of the Large-Scale Wind	492
Book Reviews	502

Contents 1/1982

M. Kurz A Case Study of Cyclogenesis in a Moving Coordinate System	1
Y. Mahrer, M. Segal The Inland Distribution of Potential Evaporation in Central Israel	18
K.M. Welch, W.G. Zdunkowski Backscattering Approximations and their Influence on Eddington-Type Solar Flux Calculations	28

J. Steppeler Treatment of Discontinuous Finite Element Basis Functions as Distributions	43
E. Ruprecht An Investigation of Tropical Cloud Clusters over the GATE Area Part 1: The environmental fields of the cloud ensembles within the cloud clusters	61
Book Reviews	79
 Contents 1 /1983	
G. Becker and H. Volland Return-Stroke Electromagnetic Fields of Oblique Light Channels	1
K. Rose On the Influence of Nonlinear Wave-Wave Interaction in a 3-D Primitive Equation Model for Sudden Stratospheric Warmings	14
M.A. Atwater and J.T. Ball A Radiation Model Using Hourly Meteorological Data with Results from GATE	42
U. Sievers, R. Forkel, W. Zdunkowski Transport Equations for Heat and Moisture in the Soil and their Application to Boundary Layer Problems	58
R. Pirich and H. Horvath On the Influence of Meteorological Parameters on Extinction and Mass Size Distribution of Urban Aerosol of Vienna	84
L. Lederer, H. Quenzel and E. Thomalla The Usefulness of a Bulk Refractive Index for the Calculation of the Scattering Properties of Mixtures of Aerosol Particles at Wavelength 530 nm	94
K. Fraedrich and K. Müller On Single Station Forecasting: Sunshine and Rainfall Markov Chains	108
C. Wamser and W.J. Müller Doppler-SODAR Measured Variations of Mean and Turbulent Wind Field during PUKK	135
 Satellite Imagery	
E. Raschke Clouds over Antarctic Ice and Snow Fields	147
H. Schulze-Neuhoff Cumulonimbus Mother and Daughter Cells Observed by NOAA 7 - and "The Cumulus Spore Theory"	

	152
Book Reviews	160
 Contents 2 /1983	
J. Egger Pressure Distributions in the Dischma Valley During the Field Experiment DISKUS	163
B. Brümmer Influence of Mean Divergence, Mean Vorticity and Height-Dependent Eddy Viscosity on Thermal Instability	177
H. v. Storch and I. Fischer An Analysis of Geopotential Height at 300 mbar in the Frequency Wavenumber Domain Along 50°N in Observed and Modelled January Climate	199
A. Spekat and K. Fraedrich Further Studies on Single Station Climatology: (iii) Time Spectral Analysis of Halley Bay (Antarctic) Rawinsonde Data	213
K. Fraedrich and T. Dümmel On Single Station Forecasting: The Geopotential Height, its Vertical and Times Structure and 500 mbar ARMA Prediction	221
W. Paschen The Influence of the Differencing Methods Used on the Solution of the Barotropic Nestling Problem	240
H. Fischer, F. Fergg, H. Oelhaf, D. Rabus, W. Völker and P. Burkert Simultaneous Detection of Trace Constituents in the Middle Atmosphere with a Small He-Cooled, High Resolution Michelson Interferometer (MIPAS)	260
 PUKK-Results	
J. Schmetz, F. Diekmann and E. Raschke Measurements of Solar Radiation Absorption in the Clear Atmosphere During PUKK	276
 Satellite Imagery	
E. Rasmussen Examples of Sea Breeze Systems over Southern Scandinavia as seen from Satellites	281
R. F. Paulus A Complex Vortex-System Observed by the AVHRR of NOAA 6	284

Book Reviews 287

Contents 3 /1983

I. Haupt, H. Billing and S. Jobst Determination of Sea Surface Temperatures and Atmospheric Correction Values for Infrared Images on the Base of Data of the Meteorological Satellite NOAA 5	295
R. Kandel Satellite Observation of the Earth Radiation Budget	322
J. Oerlemans On the Intensity of Atmospheric Convection	341
H. Fischer, F. Fergg, D. Rabus, W. Völker and H.J. Bolle Determination of H ₂ O and CH ₄ Profiles from Data of a Nadir to Limb Scanning Balloon-borne Radiometer	354
Short Contribution	
A.H. Gordon Supra-annual Variations of Geopotential Heights in the Subtropical Stratosphere	375
PUKK-Results	
E. Schaller Synoptic Forcing of the Planetary Boundary Layer: A Case Study from the PUKK Experiment	382
Satellite Imagery	
St. Emeis Development of a Thunderstorm Complex	399
R. F. Paulus Vortex-like Cloud Structure over the North Sea	405

Book Reviews 407

Contents 4/1983

B. Bonnel, Y. Fouquart, J.C. Vanhoutte, C. Fravallo and R. Rosset Radiative Properties of some African and Mid-latitude Stratocumulus Clouds	409
S. Twomey Radiative Effects in California Stratus	429

G.J. Cats and O. Akesson An Investigation into a Marked Difference Between Two Successive ECMWF-Forecasts of September 1982	440
H. Kapitza The Influence of Clouds and Rain on the Determination of Temperature Profiles from Microwave-Radiation at 54.4 GHz and 58.0 GHz	452
T. Aoki A Generalized Representation of Objective Analysis	464
F. Herbert PRIGOGINE's Diffusion Theorem and its Application to Atmospheric Transfer Processes Part 2: Invariance Properties and Fick Type Diffusion Laws	480
K. Labitzke and B. Naujokat On the Variability and on Trends of the Temperature in the Middle Stratosphere	495
Satellite Imagery	
H. Billing, I. Haupt and W. Tonn Evolution of a Hurricane-like Cyclone in the Mediterranean Sea	508
Book Reviews	511

Contents 1 /1984

J. Lenoble and C. Brogniez A Comparative Review of Radiation Aerosol Models	1
A. Yousef and E. Roeckner Parameterization of Cumulus-scale Heat, Moisture and Momentum Fluxes with a Modified ARAKAWA-SCHUBERT Model	21
L.J. Breuer and R.K. Kreuels Dependence of Rain Intensity Maxima on Time Base	39
M. Ponater and P. Speth Conversions Between Available Potential Energy and Kinetic Energy in January	55
R. Steinacker Area - Height Distribution of a Valley and its Relation to the Valley Wind	64
R. Forkel. W.-G. Panhans, R. Welch and W. Zdunkowski	

A One-Dimensional Numerical Study to Simulate the Influence of Soil Moisture, Pollution and Vertical Exchange on the Evolution of Radiation Fog	72
F. Wippermann Air Flow over and in Broad Valleys: Channeling and Counter-Current	92
PUKK-Results	
G. Mast, O. Walk and N. Witte Energy Balance of the Earth Surface and Resistance Laws at the Station "30 km" during PUKK	106
Satellite Imagery	
M. Eckardt and W. Tonn The Migration of Ice Floes in the Eastern Greenland Current During June 1983	115
Book Reviews	119
Contents 2/1984	
J. Egger On the Theory of the Morning Glory	123
H.-D. Schilling Baroclinic Instability of Ultralong Waves. Part 1: Low Order Model	135
H.-D. Schilling Baroclinic Instability of Ultralong Waves. Part 11: Nonlinear Baroclinic Outburst Episodes	150
G. Hartjenstein Observational Evidence of the Relations Between Large-Scale Orographic Forcing, Blocking and the Stratospheric Winter Circulation	169
Günter Fischer Spectral Energetics Analyses of Blocking Events in a General Circulation Model	183
Helga Behr and Erich Roeckner Limited Area Model Forecasts of North Sea Storm Cyclones for Use in a Storm Surge Prediction System	201
M. Tiedtke The Effect of Penetrative Cumulus Convection on the Large-scale Flow in a General Circulation Model	216
A. Hense and E. Heise A Sensitivity Study of Cloud Parameterizations in General Circulation Models	240

T.A. Prosch, Wen-Hwa Lin, E. Raschke Polarization and Anisotropy Effects of Spectral Pyranometers with Filter Domes	259
Werner Pollinger and Peter Wendling A Bispectral Method for the Height Determination of Optically Thin Ice Clouds	269
Short Contribution	
F. Wippermann Do Flat Mountain Ranges also Channel the Air Flow?	282
Satellite Imagery	
Jane D'Aguanno Comments on the Article Entitled "Clouds over Antaretic Ice and Snow Fields" by E. Raschke	285
Book Reviews and Corrigendum	287
Contents 3/1984	
A. Wiin-Nielsen Low- and High-Index Steady States in a Low Order Model With Vorticity Forcing	291
G. Becker and H. Volland Planetary Waves in a Latitudinally Dependent Averaged Circulation	307
U. Sievers The Turbulent Atmosphere and the Inclusive System of Model Equations	324
J. Dibbern Potential Use of a Bistatic Dual Polarization Radar for Mesuring Precipitation	346
R. Bleck and C. Mattocks A Preliminary Analysis of the Role of Potential Vorticity in Alpine Lee Cyclogenesis	357
L. Dell'Osso and D. Radinovic A Case Study of Cyclone Development in the Lee of the Alps on 18 March 1982	369
A. Buzzi, G. Giovanelli, T. Nanni, M. Tagliazucca Study of High Ozone Concentrations in the Troposphere Associated With Lee Cyclogenesis During ALPEX	380
P. R. Bannon A Semi-Geostrophic Model of Frontogenesis Over Topography	393

H. C. Davies On the Orographic Retardation of a Cold Front	409
J. Paegle, J.N. Paegle, M. McCorcle, E. Miller Diagnoses and Numerical Simulation of a Low-Level Jet During ALPEX	419
C. Cacciamani, S.C. Nanni, T. Paccagnella, C. Scarani, F. Tampieri, F. Trombetti Mesoscale Interaction of Stratified Flow and Topography in the Po Valley: A Diagnostic Study	431
Short Contribution	
H. von Storch An Accidental Result: The Mean 1983 January 500 mb Height Field Significantly Different from its 1967-81 Predecessors	440
Book Reviews	445
 Contents 4/1984	
G. Ragette Analysis of a Frontal System over Central Europe	447
P. Speth and R. Meyer The Interference of Planetary Waves for the Formation of Atlantic-European Blocking: Observational Evidence	463
 ALPEX-Results	
M. Hantel, E. Reimer and P. Speth ALPEX-Diagnostics: Quantitative Synoptics over Europe	477
S. Emeis and M. Hantel ALPEX-Diagnostics: Subsynoptic Heat Fluxes	495
G. Frenzen and P. Speth ALPEX-Diagnostics: Kinetic Energy and Vorticity Budgets for a Case of Lee-Cyclogenesis	512
J.A. McGinley Scaling and Theoretical Considerations in Variational Analysis of Flow Around Mountains	527
P. Pettre Contribution to the Hydraulic Theory of Bora Wind Using ALPEX Data	536

Area and Duration of High-Intensity Rain Shafts Observed in Summer Showers	589
Satellite Imagery	

G. Heinemann
Lee-Vortices in the Antarctic 599

Book Reviews 603

Contents 1/1987

St. Hastenrath and J. Merle
On the Annual Cycle of Subsurface Heat Budget and Thermal Structure of the Tropical Atlantic 1

F. Schmidt
On Monsoon Winds 12

K. Fraedrich
El Niño Iterations 22

A. Hense
On the Possible Existence of a Strange Attractor for the Southern Oscillation 34

Ch.-D. Schönwiese
Observational Assessments of the Hemispheric and Global Climate Response to Increasing Greenhouse Gases 48

G.W. Reuter and M.K. Yau
Numerical Modelling of Cloud Development in a Sheared Environment 65

W. von Hoyningen-Huene and A. Raabe
Maritime and Continental Air Mass Differences in Optical Aerosol Extinction Data 81

J.R. Garratt and W.L. Physick
Numerical Study of Atmospheric Gravity Currents. II: Evolution and External Influences 88

D. Spänkuch, J. Güdner and W. Dohler
Investigations on Temperature Soundings Using Partial Interferograms 103

Satellite Imagery

U. Ebel and N. Kalthoff
Developing Cold Front with Mesoscale Structure 122

Book Reviews 126

Concise Book Reviews 130

Contents 2/1987

H.H. Lamb What Can Historical Records Tell us About the Breakdown of the Medieval Warm Climate in Europe in the Fourteenth and Fifteenth Centuries - An Experiment	131
A. Chlond A Numerical Study of Horizontal Roll Vortices in Neutral and Unstable Atmospheric Boundary Layers	144
P. Becker Three-Dimensional Investigations of Roll Vortices: A Case Study	170
G. Hoidale, M. Kays, J. Lindberg and F. Burlbaw Comparison of Methods for Estimating Slant-Path Transmittance in the Visible	180
A.A. Tsonis and J.B. Elsner Fractal Characterization and Simulation of Lightning	187
K. Arpe and E. Dittmann Comparison of Forecast Performances up to 5 Days with a Global and a Hemispheric Model	193
K.J. Wilson and B.F. Ryan The Subsynchronous Scale Environment of Mesoscale Convective Weather Systems at Genesis over Southeastern Australia	210
R. Busen and G. Hänel Radiation Budget of the Boundary Layer Part I: Measurement of Absorption of Solar Radiation by Atmospheric Particles and Water Vapor	229
G. Hänel Radiation Budget of the Boundary Layer Part II: Simultaneous Measurement of Mean Solar Volume Absorption and Extinction Coefficients of Particles	241
G. Hänel Radiation Budget of the Boundary Layer Part III: The Mean Solar Volume Absorption Coefficients of Water Vapor for Direct and Diffuse Radiation	248
S. Das, U.C. Mohanty and O.P. Sharma Semi-Prognostic Test of the ARAKAWA-SCHUBERT Cumulus Parameterization During Different Phases of the Summer Monsoon	255
Book Reviews	276

Contents 3/1987

M. Yoshino and R. Kawamura Periodicity and Propagation of Sea Surface Temperature Fluctuations in the Equatorial Pacific	283
U. v. Zahn and R. Neuber Thermal Structure of the High Latitude Mesopause Region in Winter	294
M. Rančić and M. Ruml Effects of the 2-nd and 4-th Order Conservative Advection Schemes on Simulation of Helmholtz and Haurwitz Instability	305
G. Hänel The Role of Aerosol Properties During the Condensational Stage of Cloud: A Reinvestigation of Numerics and Microphysics	321
R. Forkel, U. Sievers and W. Zdunkowski Fog Modelling with a New Treatment of the Chemical Equilibrium Condition	340
G. Adrian Determination of the Basic State of a Numerical Mesoseate Model from Operational Numerical Weather Forecasts	361
S.B. Smith and M.K. Yau The Mesoscale Effect of Topography on the Genesis of Alberta Hailstorms	371
R. Stuhlmann and E. Raschke Satellite Measurements of the Earth Radiation Budget: Sampling and Retrieval of Short Wave Exitances - A Sampling Study	393
Book Reviews	411
Contents 4/1987	
Articles	413
U. Schumann, T. Hauf, H. Höller, H. Schmidt and H. Volkert A Mesoscale Model for the Simulation of Turbulence, Clouds and Flow over Mountains: Formulation and Validation Examples	413
St. Hastenrath, L.C. de Castro and P. Aceituno The Southern Oscillation in the Tropical Atlantic Sector	447
H. v. Storch A Statistical Comparison with Observations of Control and EI Nino Simulations Using the NCAR CCM	464
W. Shao wu	

A Version of the Circulation Scheme in the Equatorial Zone	478
Announcement	488
Meteorologischer Kalender 1988	488
Book Reviews	489
Contents 1/1988	
Editorial	III
Articles	
M. Weller and U. Leiterer Experimental Data on Spectral Aerosol Optical Thickness and its Global Distribution	1
J.C. Ceballos On Two-flux Approximations for Shortwave Radiative Transfer in the Atmosphere	10
L. Quanhua and J. Schmetz On the Problem of an Analytical Solution to the Diffusivity Factor	23
G.W. Reuter Water Budget and Kinetic Energy Transformations of a Mixed-Phase Cumulus Cell: Three Dimensional Numerical Simulation	30
M. Claussen On the surface energy budget of coastal zones with tidal flats	39
W. Etling and H. Schwentek Is there a Trend in Stratospheric Temperature from 1960 to 1986 Detectable in Berlin Data?	50
Short Articles	
J.M. Hacker, Y. Shao, R.A.D. Byron-Scott, P. Schwerdtfeger The Vertical Sensible and Latent Heat Transport in the Boundary Layer of the Upper Spencer Gulf Area - A Case Study	56
D. Heimann and H. Volkert The "Papal Front" of 3 May 1987 - Mesoscale Analyses of Routine Data	62
Book Reviews	69
Contents Vol. 61, No. 2, May 1988	

Articles

- F. Schmidt
On Critical Layer Instability 73
- M. Lautenschlager, D.P. Eppel and W.C. Thacker
Subgrid-Parameterization in Helical Flows 87
- H. Savijärvi and M. Alestalo
The Sea Breeze over a Lake or Gulf as the Function of the Prevailing Flow 98
- S.A. Tjemkes and P.G. Duynkerke
A New Look at the Goody Band Model 105
- J.W. Hutchings and J.W. Gellen
The Lunar Barometric Tide in the Tropical Southwest Pacific 114
- H.-J. Huang und D.G. Vincent
Active and Inactive Phases of the South Pacific Convergence Zone and Changes in Global Circulation Patterns. A Case Study 123

Short Articles

- W. Etling and H. Schwentek
The Average Deviations in Winter and in Spring from the Basic Annual Variation of Stratospheric Temperature over Berlin 135
- J. Egger
Frictionally Induced Circulations in Fronts 140

ALPEX Report

- P. Pettre
Descriptive Experimental Analysis of Two Bora Cases Using ALPEX Aircraft Data 143

Book Reviews 151

Contents Vol. 61, No. 3, August 1988

Articles

- R. Sausen
A Closure Hypothesis for Atmospheric Macro-Turbulence 155
- A. van Delden
On the Flow-Pattern of Shallow Atmospheric Convection 169
- J. Eichhorn, R. Schrodin and W. Zdunkowski
Three-Dimensional Numerical Simulations of the Urban Climate 187

F. Somieski, P. Koepke, K.T Kriebel and R. Meerkötter Improvements of Simple Radiation Schemes for Mesoscale Models: a Case Study	204
G. Gross A Numerical Estimation of the Deforestation Effects on Local Climate in the Area of the Frankfurt International Airport	219
B. Brümmer Structure and Circulation in the Boundary Layer at a Strong Cold Front	232
G. Heinemann On the Structure and Energy Budget of the Boundary Layer in the Vicinity of the Filchner/Ronne Ice Shelf Front (Antarctica)	244
Correspondence	
W. Zdunkowski and T. Trautmann Comments on the Article Entitled "On the Problem of an Analytical Solution to the Diffusivity Factor" by L. Quanhua and J. Schmetz	259
Liu Quanhua and J. Schmetz Reply to the Comments	259
Book Reviews	260
 Contents Vol. 61, No. 4, November 1988	
Articles	
M. Rancić and S. Nicković Numerical Testing of E-Grid Horizontal Advection Schemes on the Hemisphere	265
W. Wergen The Diabatic ECMWF Nomial Mode Initialisation Scheme	274
M.A. Box, S.A.W. Gerstl and C. Simmer Application of the Adjoint Formulation to the Calculation of Atmospheric Radiative Effects	303
A. Chlond Numerical and Analytical Studies of Diabatic Heating Effect upon Flatness of Boundary Layer Rolls	312
D. Heimann The "Papal Front" of 3 May 1987: Modelling of Orographic and Diabatic Effects	330

C. Koch A Coupled Sea Ice - Atmospheric Boundary Layer Model. Part 1: Description of the Model and 1979 Standard Run	344
M. Dameris Investigation of the Influence of the Equatorial Quasi-Biennial Oscillation on the Evolution of Stratospheric Warmings Using a Three-Dimensional Circulation Model	355
Book Reviews	367

Contents Vol. 62, No. 4, February 1989

Articles

R. Müller On the Structure of the Global Linearized Primitive Equations Part 1: Basic Equations and Vertical Structure	1
K. Haderlein On the Dynamics of Orographically Retarded Cold Fronts	11
J. Egger Föhn and Quasi-Stationary Fronts	20
P. Binder, H. C. Davies and J. Horn Free Atmosphere Kinematics above the Northern Alpine Foreland During the ALPEX-SOP	30
Yuanjing Zhu, Zuyu Tao, Tomas Ting and Gary Hunt An Investigation of the Relationship between Winter Temperatures in China and the Global Outgoing Longwave Radiation in 1974-1984	46
G. Gross Numerical Simulation of the Nocturnal Flow Systems in the Freiburg Area for Different Topographies	57
Book Reviews	73

Contents Vol. 62, No. 2, May 1989

Articles

H. Volland Rossby-Haurwitz Waves with Zero Zonal Wavenumber	77
P.F. Hodnett and W.M. O'Brien	

On the Non-linear Barotropic Instability of Rossby Wave Motion	90
H.L. Tanaka, E.C Kung and W.E. Baker Normal Mode Energetics and Error Analysis of GLA GCM Simulations with Different Horizontal Resolutions during a Winter Month	99
R. Müller On the Structure of the Global Linearized Primitive Equations Part II: Laplace's Tidal Equations	112
D. Lüthi, C. Schär and H.C. Davies On the Atmospheric Response to Steady Mesoscale Low-Level Diabatic Heating	126
J. Steppeler Analysis of Group Velocities of Various Finite Element Schemes	151
Book Reviews	162

Contents Vol. 62, No. 3, August 1989

Articles

K.T. Kriebel, R.W. Saunders and G. Gesell Optical Properties of Clouds Derived from Fully Cloudy AVHRR Pixels	165
S. Twomey and T. Cocks Remote Sensing of Cloud Parameters from Spectral Reflectance in the Near-Infrared	172
J.C. Ceballos Stochastic Properties of Two-Flux Shortwave Radiative Transfer in the Atmosphere	180
M.A. Box, S.A.W. Gerstl and C. Simmer Computation of Atmospheric Radiative Effects via Perturbation Theory	193
M.A. Box, B. Croke, S.A.W. Gerstl and C. Simmer Application of the Perturbation Theory for Atmospheric Radiative Effects: Aerosol Scattering Atmospheres	200
U. Callies Entropy Production by Atmospheric Scattering of Light	212
F. Künzle Maximum Entropy Spectral Estimation: Some New Statistical and Numerical Details	227
M. Claussen Subgrid-Scale Fluxes and Flux Divergences in a Neutrally Stratified, Horizontally Inhomogeneous Surface-Layer	236

Book Reviews	246
